

FIGURE 6-F

Exports of computer, electronic, and optical equipment, by selected region, country, or economy: 2015

EU = European Union.

Note(s)

Exports measured on a gross basis include value of domestic content and intermediate inputs supplied by other countries. Exports measured on value-added basis include value of domestic content and exclude value of intermediate inputs supplied by other countries. U.S. exports do not include exports to Canada and Mexico. The EU includes 28 current member countries. EU exports do not include exports among individual EU member countries. China includes Hong Kong. China's exports do not include exports between mainland China and Hong Kong.
